

CEMENT and CONCRETE WORLD SEPTEMBER/ OCTOBER 2009

News

- Limak Gaziantep Cement Plant
- Environmental News
- News from the Sector
- The Colleagues Meeting for the Environment Group

Research and Development

- Energy Performance of Concrete- A Key to Sustainable Construction
- Accelerated Strength Testing of Roller Compacted Concrete Containing Natural Pozzolan

Meetings and Announcements

Literature Survey

- Sulfate Resistance Improvement of Blended Cement Based on Ground Granulated Blast Furnace Slag
- Modelling the Circulating Sulfur, Chlorine and Alkali Systems in the Clinker Burning Process
- A Greener Blend
- Kiln Mechanical Design
- Prospects for New Cements
- Achieving Greater Substitution
- True Optimization
- Fanna's Cooler Conversion
- Development of Alkali- Silica Reaction on Under Compressive Loading and Its Effects on Concrete Behavior
- Strength and Shrinkage Behaviors of Roller- Compacted Concrete with Rubber Additives
- Durability of Self- Consolidating Concrete to Different Exposure Regimes of Sulfate Attack
- Abrasion Resistance of Concrete in Hydraulic Structures
- A Pore Structure of Concrete with Mineral Admixtures and Its Effect on Self- Desiccation Shrinkage
